Modul: Digital Technologies in Field Information Modeling

Dear learners,

The Department of Digital Engineering and Construction at the Institute of Technology and Management in Construction (TMB) is offering a new module, called, Digital Technologies in Field Information Modeling (FIM), on the Summer 2021 semester. In this course, the learners will get familiarized with the established and advanced technologies and methods for collection and analysis of field construction data within the Building Information Modeling (BIM) and digitization in construction frameworks. Further information about the module can be found in the module Handbook.

The lectures will take place online on the following dates:

<table>
<thead>
<tr>
<th>Dates</th>
<th>every Friday, 14:00-17:30 hrs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access</td>
<td>the link will be available in ILIAS</td>
</tr>
<tr>
<td>Start Date</td>
<td>16.04.2021</td>
</tr>
<tr>
<td>Language</td>
<td>English</td>
</tr>
</tbody>
</table>

Exam:
Further information about the examinations can be found in the module Handbook.

Registration:
The capacity for Summer 2021 is limited to 20 students. You can self-register for the course, 6244801 – Digital Technologies in Field Information Modeling, on ILIAS using the following link:

Once the capacity is full, you will be automatically placed on a waiting list. The course is on a first come first serve basis; hence, the sooner you register the higher your chances of participation will be.

I am very much looking forward to seeing you all in the course.

Take care of yourself and your fellow people. Stay healthy!

Jun. Prof. Reza Maalek
